Quick support in discord

1. 108keys Full Size Layout

2. FN Combination

	Combination	Win Mode	Mac Mode
FN +	, < (Win) / . > (Mac)	win mode	Mac mode
	Q	2.4G(5seconds)	
	E	BT1(5seconds)	
	R	BT1(5seconds)	
	T	BT1(5seconds)	
	Y	Wired(5seconds)	
	←	Reduce light efficiency frequency	
	→	Increase light effect frequency	
	↑	Increase light brightness	
	↓	Reduce light brightness	
	Tab	Switch light color	
	\	Switch light effects	
	Pause	Turn off keyboard light	
	L	Turn off charging indicator light	
	win	lock win	
	F1	turn on music	Reduce display brightness
	F2	turn off sound	Increase display brightness
	F3	Volume down	open mission control
	F4	Volume up	Search function (only available on compatible laptops)
	F5	music stops	Voice recognition (compatible laptops only)

	F8	Next song	Pause/Play (audio)
	F9	Mail	Skip forward (audio)
	F10	Homepage	Mute
	F11	Calculator	volume increase
	F12	My Computer	Volume down

3. Bluetooth/2.4G/Wired Pairing/Software:

2.4G Pairing:After the keyboard is turned on,Press Fn+Q to enter 2.4G mode.at this time,the Q flash

slowly, Long press Fn+Q for 5seconds to enter Pairing mode. the Q flash quickly, plug the receiver now. after pairing success, The Q will stop flashing.

After 30seconds not finding the paired device, The Q indicator will turn off, keyboard will go back to sleep mode. so you can try again and connect.

(Since 2.4G communication is easily affected by wifi and bluetooth frequency, if connection failed for the first time, try temporarily turn off the wifi and bluetooth at home, reset the keyboard(Fn+esc for 3seconds), then continue to connect. once the connection succeed, it will basically not failed again.)

Bluetooth pairing: After the keyboard is turned on, Press Fn+E/R/T to enter bluetooth mode. at this time, the E/R/T flash slowly, Long press Fn+E/R/T for 5seconds to enter Pairing mode. the E/R/T flash quickly, open your computer bluetooth and searching, once keyboard show up, connect the keyboard. after pairing success, The E/R/T will stop flashing.

Wired connection: turn off the keyboard and plug type-c cable.

Software connection: turn off the keyboard and plug type-c cable.
